

Your company is unique and so
are your environmental needs.

Environment. Technology. Efficiency.

Customized solutions for waste and emissions treatment.

We are an environmental technology company focused on the development of customised solutions for emissions and hazardous waste treatment for large industrial companies.

We design and implement customised projects aimed at minimizing the ecological footprint generated during production processes.

Our work philosophy is based on long-term collaboration. With Tecam, there will always be a team of experts in environmental technology available to you to provide the solutions your business needs, wherever and whenever you need them.

A way of thinking.

We believe in a non-polluting industry.
We work towards a profitable industry.

At Tecam, we believe in a commitment between industry and society that goes beyond the production of goods and services. We work every day towards more eco-friendly and fully sustainable industrial production processes.

At Tecam, we work with great determination to reduce polluting industrial waste; we understand technological innovation and energy generation as ways to preserve the environment and our health.

We believe it is our responsibility to be a partner that brings value to our customers, providing them with tools and services that make them less polluting and more profitable through efficient use of resources.

Our effort, determination and day-to-day work is aimed at making your environmental investments profitable. We are committed to ensuring a better future for society through responsible and eco-friendly industry.

This commitment is reflected in our way of working and corporate social responsibility.

Our company has ISO 14001 certification on Environmental Management Systems and our business activity and decision-making are aligned with the United Nations Sustainable Development Goals.

Committed to sustainability,
committed to health,
committed to the future.

Environment.

A way of being.

We design advanced technology for the industry and the environment.

We are convinced that environmental sustainability is the only viable path for the future of industry; it is common sense and consumers demand it.

At Tecam, we are ambitiously taking on that challenge. We know that the only possible answer is to design technologies that combine maximum environmental efficiency and the optimization of these resources to avoid affecting the productivity of industrial processes.

All our R&D and technical and service solutions have this double focus: we provide our partners with high-tech solutions to serve their business and the environment.

Tecam is made up of a group of professionals who make this challenge a way of being. It is the only way to offer you the solutions your company needs:

- We are decisive: we provide solutions adapted to every situation and project.
- We are swift: when our customers need us, we react immediately, providing the necessary resources wherever they are required.
- We are passionate: we love our work and we have a vocation for service. Our customers can rest assured. With Tecam, they will always have the right solutions to solve all their needs.

We are passionate, we are decisive,
we are swift; it is the only way to offer
you the solutions your company needs.

Technology.

A way of doing.

We are constantly moving forward
so that your company is always at the forefront.

We get the results we are looking for and that our customers need thanks to the way we understand professional relationships:

- We work with our customers as specialized technology partners in a relationship based on honesty and trust.
- We are restless; research is in our DNA. That is how we keep our customers permanently up-to-date on environmental issues.
- We bring real value to your company, through proximity and commitment, with constant support for your development and planning teams.

We want to be the ally that guides your company in environmental management so that your team can focus its efforts on generating business and solving production problems.

At Tecam, we take care of designing the best environmental solutions. We keep your equipment in perfect working order and keep you up-to-date on the latest developments in the sector that might benefit your business.

Proximity, commitment and constant support. Professional relationship as technology partners.

A photograph of two workers in a large industrial facility, likely a power plant or refinery. They are wearing white hard hats with the Tecam logo and teal and dark blue work jackets. One worker is pointing towards the background, which is filled with complex piping and structural elements. The image has a teal overlay at the top and bottom.

Efficiency.

A way of working.

Don't stress. You can count on a team of experts for your waste and emissions treatment.

At Tecam, we are experts in environmental management and monitoring for large industries. Our know-how and products are focused on covering your needs by adding value, and our processes have been designed to adapt to your way of working, thus minimizing our impact on your day-to-day.

During the planning phases, our engineers will analyse the project's characteristics with your technicians, assess the options available and offer you the most suitable solutions for each case.

Once the project is defined, we develop and manufacture the equipment at our facilities, where it gets tested and pre-assembled to prevent any incidents during the installation phase.

Once the equipment is built, we coordinate installation and commissioning with your plant managers as quickly and safely as possible given your production needs.

Once underway, you will have the permanent support of our technical team for the maintenance and upkeep of the installation.

Lastly, with Tecam, you don't just get equipment but a technological partner that will always keep you at the forefront of industrial emissions and hazardous waste treatment.

Comprehensive advice on the use and integration of environmental technology. Customized solutions and tailor-made designs.

Emissions >
Waste >

Emissions >

Abatement of polluting gases and particles.

At Tecam, we are specialized in the treatment and elimination of Volatile Organic Compounds (VOCs) and other polluting emissions. You can count on us. We are skilled at managing any kind and degree of environmental issue.

Main emissions treated

- Volatile Organic Compounds (VOCs)
- NO_x
- SO_x
- Chlorinated hydrocarbon
- Residual gases without oxygen
- Wet and corrosive residual gases
- Odours
- Particles, halogens and aerosols
- Hydrocarbons and carbon monoxide
- Dioxins and furans
- Alkaline compounds and particles

REGENERATIVE THERMAL OXIDATION | SCRUBBERS | ADSORPTION SYSTEMS

Waste >

Treatment and valorization of hazardous and special waste.

At Tecam, we develop technologies and equipment that solve one of the industry's main environmental problems: the treatment and disposal of hazardous or highly polluting waste. We offer on-site solutions that eliminate travel complications and external treatment.

Types of waste treated

- Industrial waste
- Hazardous waste
- Solid waste
- Liquid waste
- Radioactive waste (NORM)
- Medical and hospital waste
- Recycling plant waste
- Municipal solid waste (MSW)

Energy recovery

Tecam waste-treatment equipment generates energy in the form of steam, hot water or electricity by design, which can be recovered in the production processes of the plant.

A passion for big challenges.

We envisage environmental solutions for the new challenges your business will face.

At Tecam, we love our profession, we are ecologists and passionate about technology. The union of both forces is our leitmotif, our vocation, the axis that upholds our activity and drives us to continue developing new environmental solutions.

Research has always been one of our main focuses for growth. We work today with our customers and partners on techniques that will help strengthen a non-polluting industry in the future.

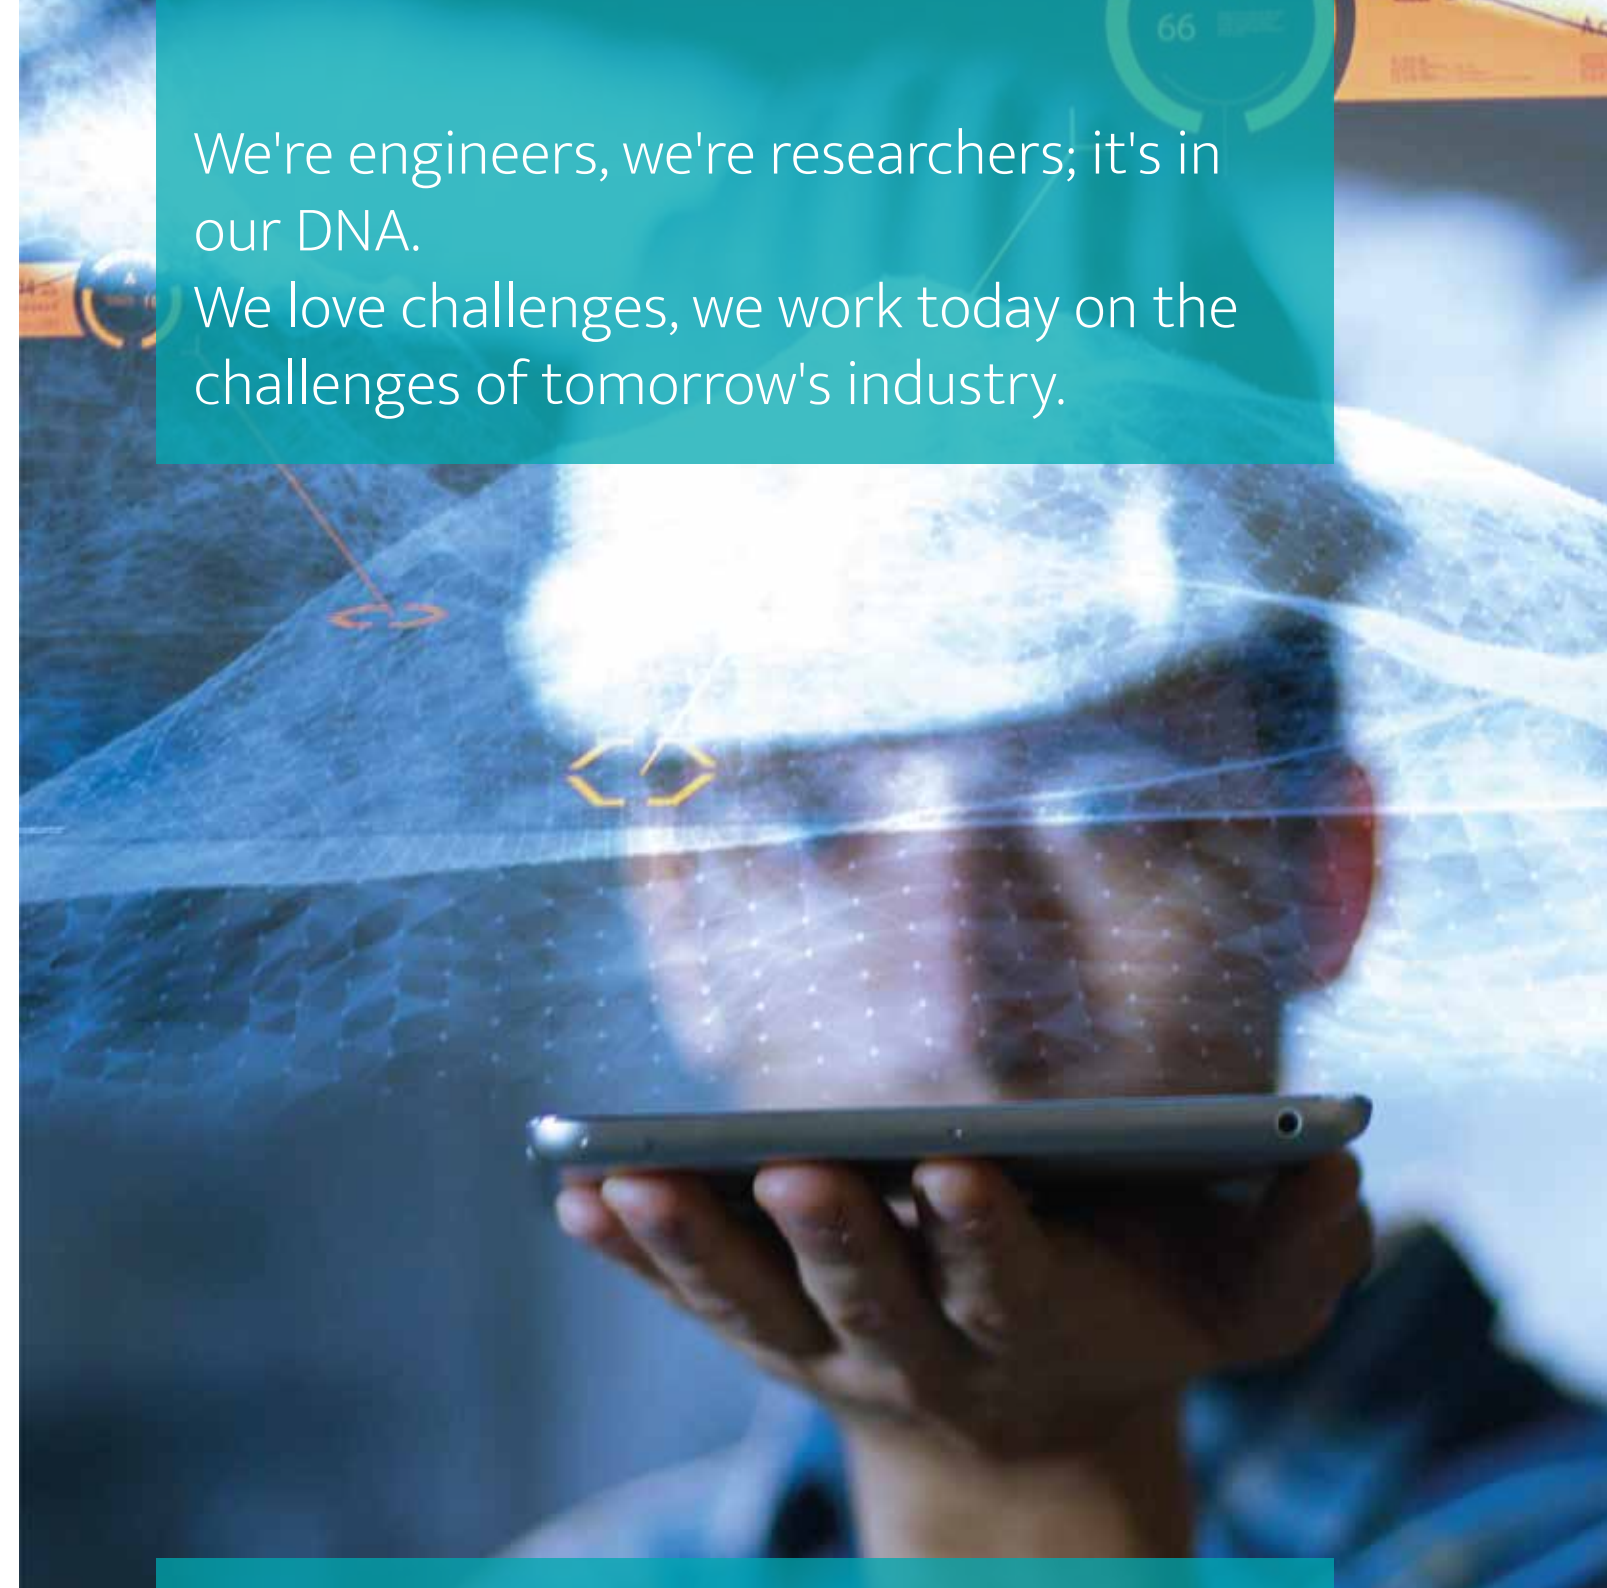

We are passionate about challenges, which is why we have opted to work with large industries and companies that face the greatest challenges.

It doesn't matter how big or complex the problem is — at Tecam we conduct research and come up with solutions ahead of their time. As an example, we might mention the solutions we have designed and implemented at the request of some of our clients in radioactive waste management and pyrolysis.

With Tecam, you have a partner that will allow you to focus your efforts on your business with the total guarantee of always being prepared to meet the most demanding environmental requirements.

We're engineers, we're researchers; it's in our DNA.

We love challenges, we work today on the challenges of tomorrow's industry.

Meeting and anticipating your needs: our daily motivation.

Vocation for service, the recipe for success
that our customers enjoy even more than us.

At Tecam, we are focused on providing environmental support to large industries. We work with them through customised turnkey projects, providing unique solutions for each case and customer.

We specialize in the chemical, petrochemical, pharmaceutical and Oil & Gas sectors. We know how to address your complex technical and logistic needs and work to anticipate your problems and develop technologies to solve them.

At Tecam, we guarantee the results you need with a combination of talent, professionalism and quality that allow you to rest assured:

- A team of professionals with training and experience specialized in environmental technology applied to large companies.
- The highest quality materials, components and software.
- Cutting-edge engineering based on our own design and manufacturing standards, certified through the most demanding international approvals.
- Work processes adapted to your security protocols with clear, definitive schedules and no surprises.
- A development department that works today to solve your problems tomorrow.

Highly qualified teams, maximum quality
and cutting-edge engineering.
That is how we guarantee you can rest
assured.
